

La Primavera Primera

in anticipation of spring

Pitching Season

aligned with priority
and now to pitching season
let's hear your thoughts, and hear mine too
let's focus on our reason

it's hard to focus on the cause
there's many cause in type
and some are greener fielded buds
though some are swollen ripe

so pitch to me your thoughts on work
that this year we can do...
pursuing work of yours and mine
will complement our crew

so here's to pitching season: cheers!
and here's to many thru the years!

2025-01-17

Physics of Attention

the laws of physics don't quite work
with people in relation
if you perform on center stage
don't jump right to elation

for people will internalize
on tangents mind will take
not always will the bread you've give
within my oven bake

for gravity of other things
will pull our thoughts to those
not always are the thoughts we think
the thoughts we'd thought to chose

and entropy diminishes
the impact of our love
as heat will dissipate from hearts
attention's also tough

your impact's equal opposite
may not within attention sit

2025-01-17

Forceful Grace

of how may we attention grab
within this pitching season?
for some: they reason from the feels
for others: feel the reason

our organs resonate in close
proximity to you and yours
in closeness, heart strings feel a strum
and from heart strings our music pours

you're instrumental to this place
each time I see you smile
is when my focus suffers grace
you linger for a while

and as I trudge back to the path
I'm left a bit forsake
for this damn memory is meek
priorities you take

so now I socialize my taste:
your beauty's lain life force to waste

2025-01-19

A tender gear

the gear that frees within my box
is as that of the second hand
what was a clock that minute ticked
is now unlocked to smoothly fan

the seconds, freed now of their rust
though I must follow up with grease
this fleshy gear hath now a spin
minutia of god's glory teased

as now I see the moments fresh
in faces of the passerby
and toward the global consciousness
enrapturing our love on high

twas due to reading parables
the tips of spirit in my view
I look for cosmic consciousness
within the framework of this zoo

what once was gear adjoint like glue
by grace of god has broken through

2025-01-19

La Primavera

La Primavera presence pure
solidify my budding dew
the seasons sanctify by deed
and valve releases pheromone fume

for sprites and imps and elves all dance
within our forests, though not seen
my lineage is from these woods
immortalized our dance has been

in paintings of the Renaissance
and also by the athlete types
this love is shared sororities
adjoint with love's fraternal hypes

the dance of Primavera skips
around the pole of may and june
I will have hoped this quicker came
though at that time spring came too soon

but in these daydreams I forget
it's in your eyes that spring begets

2025-01-19

Helen's Tease

ought we to aim for higher love?
a frolic in the fields
or pleasantries amongst the sprites
on Autumn's harvest yields

we thank that ripened fruit ferments
that produce brine preserves
that past the point, fruit may return
fermented hearts are served

it's hellenistic vernal art
that orients us to our best
as social creatures pleased by toil
it's toil most which pleases rest

and on our Primavera days
where marriage may-pole centers groove
the greeks have influenced our schools
they aim to paintings in the Louvre

so cast your lots on current host
however renaissance may boast

2025-01-20

Or Skin Listens

La Primavera sings to me
from time ahead in coming spring
by winter's freeze, our heart's on loan
to lend hearts back and credit spring

we insulate now from the cold
with promise to return what's ribbed
the distance of the sun relieves
though seasons are all built on fibs:

that seasons will remain as such
this is omission on repeat
let nature for us indicate
the coming weather we're to meet

interpreting my sunward gaze
I ask you move out of it's rays
for listen I with open skin
to where our tilt positions days

cause really, cosmic time resolves
what seems omitted focus solves

2025-01-21

Regimented Behaviors

Behaviors in an order operate
are thought to be determinant
a paradox that choices made are thin
are lock in step as permanent

or choices made in regiment
are freed by will, as etched from stone
as life is like piano in sustain
for life sustains with pressure on the tone

it's like the statement of procedure pure
where choices limited reduces risk
do eggs or chickens predeceess? unknown
what's known is first came not the chicks

so what comes next in patterns of remiss
relax from constant task, we ask relief
relieve the leisure time from marble space
and listen to the sun with skin like leaf

so stick to plan and do what is you meant
relieve your fellow folk with action regiment

2025-01-23

Nutrient to Live

when nutrient I can take on more
not just with layer insulation
is easier to chip away the cake
from issues resolute ablation

solutions melt away what can dissolve
to make our problems seem less resolute
and in the process we relieve from stone
our principles have pressed away the dissolute

from Chakra root up through our axis core
the nutrient flesh breathes with the air about
it's when the entropy is lessened, aims are clear
our calling pulls us in without the need to shout

so let us nutrient the ones we love
but let us live not sole to nutrient
it's shedding waste that helps us optimize
and for our fellow folk relieve in temperament

so nutrient to live, not other way around
but know to reassess upon our calling's sound

2025-01-24

Let 'em Know

invaluable are moments here
with you my elder friend
I learn about the paradox
of starting at the end

we're close in team because of this
our written verse : a way to bond
and from your process I have learnt
about your writing I am fond

we may be demographic diff
in intersectionality
and 'bout our valid stance on life
for both a true reality

for how we would not know quite much
each other's struggle in this head
it's how Jah set this earth a spin
that weighs on us with weight like lead

so let's reveal - but not as phony -
for younger folk our testimony

2025-01-26

Nature Abhors a Vacuum

there's nothing much left...

bring on the boredom

let it settle

with confidence

when I take the next step

down the stairs

with my eyes closed

harnessing this blind will

wrangling back my beam

is the modus operandi

the impetus of responsibility

lies somewhere within and behind my chest

my flesh fills the gap

a constant becoming

being forward

up and down

left and right...

my whiny is heard a mile away

2025-01-26

Qazi Monk Gantt Charts

I put on a meta headset
and was emersed!
so cool
to play a game...
but how could I not think about
choosing a naked woman to immerse with?!
is this an option, yet?
I'm not above my Monkey brain!

I have to stay away from this...
I'd rather push the broom
and scrub bugs from the servers
to maintain the matrices
as a qazi monk
with free time
to be in nature with others...
though, who's to say "inside"
is not nature?
as open-door villas
with waves of twigs rolling into the mud room
are much healthier than plastic wrapped seams - detailed...
one pair of flip flops - healthier than slippers at each door

2025-01-28

Yet Another Gift

It's time I learn from fire logic
a gift you have give
yet again
ahead of schedule
first most the resort high school
with schoolmate girls
wearing just jeans and white V necks
culture shock
really, intra refuge from recession

second, AI
35 years ahead of everyone
third, Colorado River boating
lower river junkies - our brand
fourth, is fire logic
yet another gift

for me to lessen awareness
of the ever more aspects of life
that are taxed
out of threat of incarceration

2025-02-01

Friend at Midnight

in cochise stronghold

4:30 on a brisk morning

woken up by a roar

internal heat had just reached a peak

tension in my skin

head facing furthest point from camp

certain I heard a cougar

had to get up

was at my most peaceful

now at my most alarmed

I would recognize a cat in camp?

It took millions to get me to this point

such a waste of tax-payer dollars

to have me put down

hmph

my "friend at midnight"

saith "worry not" from tent

2025-02-01

New Taxes

entrusted with talents
and though I am taxed
in that these are guaranteed
I am concerned my leaders
reapeth where they do not sow...

hard men
bottlenecking decision making
thru handheld devices
leveraging my pattern recognition
and desire to “ew” and “cute” the trough
a new currency
similar to asking to get roach out of nest
lures set in the web
like spider trotlines
feeding from the trough
in saturated market street lights
requiring I squint to see the stars
though, I may not see the same constellations
as dialect indicates ethnicity
we must listen to her express her needs...
with “ews” and “cutes”

2025-02-01

Orion's Hermes

we are made in the image
of Orion
although we see not the same constellations
he is there
with a 3 star dick
hanging towards the earth
with shoulders balanced in the same axis
hunting across the sky

not nearly the animals we attribute
to the sky lights
as closely as Orion

let's not saturate our skies
or, at least, write messages in them
perhaps on encrypted channels
so we can aim the apples anywhere
and see banners
of coca cola or amazon
or your lover's pictionary

2025-02-02

Campsite Dissent

from number theory to culture
our privilege is that I may eat meat
and not self-impose restrictions
that will hamper my ability to compete

how the scientific method of philosophy
was already applied in the epic poetry
what we consider religious texts
there are methodologies we can choose from
some contexts allow for reprieve
from self-aggrandizement
or self-deprecation
proving you can take on...
from yourself...

the campsite: I took more out of
than the campsite took out of me
we had a holistic conversation
which cochise will hold string

2025-02-04

Pitching Season Halt

the pitching season comes to halt
at moment decision of mine own
this family has asked of me
to answer pitch from kin alone

my perspective is different
than those prosecuted by love
it is the ask of needs fulfilled
which brings us in to water deserts
and in oases
where the resources are plentiful
that we blind ourselves to the longer mind
it is the survitality of a synapse
that must needs come about

are we paid to deal with conway
or parkinson or murphy
in this flow of resources?

let the mud settle
and will fulfill what hermes must transmit

2025-02-04

Sugarscape Pitches

and as pitching season
bleeds into Primavera
we are laying trot line
to see who will nibble
and when we have so many options
as the sugarscape teaches
we vibrate in competition
of what is available
in our immediate vicinity...
as the conversations pertains not to any one
as the focus is on warmth

and winterizing our pipes
and asking the neighbor boy to check
to make sure our summer home does not flood
as the lines we wait in - disrupt our priorities -
so also does our various pitches
create an action potential
for our celestial clockwork

2025-02-05

A Square Deal

beer for wood

our sleep hygiene is quenched

as every day we must leave the house

to feel safe

in our relations

in our principles

for it is in sanctification

by burning though thought fat

or Jah woods

that we find security

by the warmth of our companions

not as clean transactions

but as that we may choose with whom we are indebted

when we are free

2025-02-08

Friends Dress Alike

I'm thoroughly distracted from mortality
by this rationale
that my pull into this moment
is to contribute to the cosmic mind

though I am meant to contribute
to the conversation
with this shadowy silhouette
underlying my logic

with an etched face flesh
stern to the trite
mentioning patterns
and anomalies

how much is due to hermes
a messenger to this day
borrowing my pen
with ever more to say

it is in concentrations
that diamonds form
and mention of the prepared jewelry
where stones are set to be worn

2025-02-13

Homage to your own flame

stoke the fire through this pen
as I stroke this flinty ink
with ballpoint steel

what I am stoking with my Dad
is turning out to be
conductive with this economy

the angel intervened, and I am Isaac
concerned that I must let other ancestors
enter my selective attention

I see you stoke the fire behind your screen
to hold onto what ancestors you idolize
be them yours or others

“you want to be in my family
you just don’t know it yet...”
this is honoring my fathers

few are chosen, and many turned away
let the tares grow with the wheat
and know all is grown to be eaten

2025-02-13

This flame is relevant

my voice is faint
as I have separated
though my fathers are fine

as I aim to benchmark my behaviors
against my own
not yours

the thread of AI is 35 years deep
in my flame
conductive this has been

we are at the point of unique identifiers
in multivariate regressions
of the matrices

life cycles of objectified
mitigating risks before or after life tables
the sweet spot being Beyoncé insuring her legs

as Elton John insures his fingers
and him and his husband
are the archetypal entertainment relationship
